

Cycleo, the interactive bike

Making physical activity more
engaging and fun

TT

An ergonomic device

1 **Curved screen**
Large and immersive

2 **Touchscreen interface**
Discreet, simple and intuitive

3 **Handlebars**
Interactive and directional

4 **Adjustable crankset**
In strength and range

5 **Removable seat**
Accessible to people with reduced mobility

6 **Adjustable seat**
In distance and height, removable armrests

Double task

Physical and cognitive stimulation

Cycleo is the **only senior bike** that offers **physical** activity in a **fun** way for our elders.

By using your legs to **pedal** and your arms and head to interact with **the handlebars and tablet**, you'll be exercising without even realising it!

Games accessible to all

A rich and varied catalogue

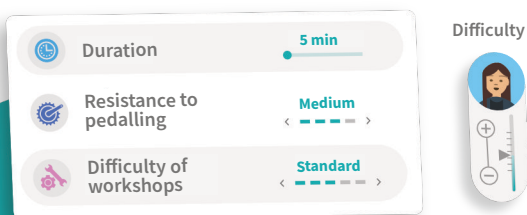

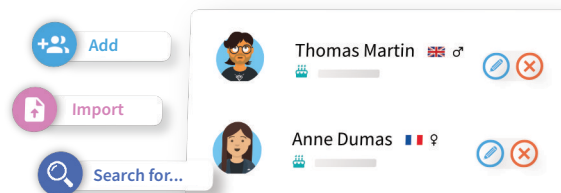

By interacting with **the application of their choice**, users can rediscover the pleasure of doing sport at their own pace, while having fun!

From relaxation to performance, from the most technophile to the most technophobic, Cycléo games are designed to be **non-stigmatising**, **adapted** to the needs and abilities of the user.

Cycleo Board

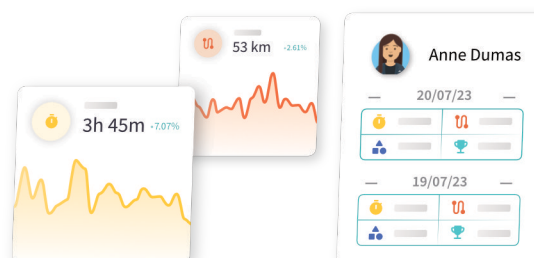

The user management and tracking platform

Add **a profile for each user**, for a unique experience.

Set the **parameters** of each application according to the level, **capabilities** and **needs** of the user.

Track **performance** and see **how it changes** from one session to the next so you can adjust your settings.

Manufactured by
100% French

Designed and assembled in
Pays de la Loire
